Dear Congressman:

In November of 2008, the citizens of the United States elected as President, a man who many knew had a very liberal and some would say a “socialist” agenda.

I believe that the majority of Americans had no idea what they were getting themselves into. This is sad.

People now more than ever before are aware what has happened and are not going to stand for it any longer.

As a registered **voter** and *VERY* ready to vote in 2012, I wish to urge you to move forward in the following areas:

- Defund / Dismantle “Obamacare”.
- Do not sign ANY bill that includes a tax hike for ANYONE currently paying taxes.
- Work towards repealing any road blocks to producing oil and natural gas from sources inside the US, including ANWAR. There is NO reason for this not to take place. Gas prices will drop with a greater supply.

President Reagan proved how to double the revenue’s to the treasury. Give us back our money to spend and we will. That will boom the economy.

Your priority’s need to work in this direction to receive a vote from me in the next election.

Sincerely,
